Webpack

## PROFILE

Software Developer with a B.Sc. in Computer Engineering, skilled in programming, SDLC, algorithms and data structures. Passionate about full-stack development, with experience in both frontend and backend, focused on delivering reliable, scalable, and high-performance web applications.

## EMPLOYMENT HISTORY

### Software Developer, Fenus B.V

Rotterdam,  
Netherlands

Sep 2023 — Jan 2024

- Delivered 10+ feature updates in collaboration with product managers and designers, improving user engagement.
- Automated daily cryptocurrency updates using CoinMarketCap API and Firebase Functions, ensuring real-time accuracy for better investment decisions.
- Improved database efficiency, reducing daily read limits by 80%, resulting in significant cost savings and enhanced system performance.

### Frontend Developer Intern, Mobile Unlocks GH

Cape Coast, Ghana

Jun 2020 — Dec 2020

Collaborated with a team to design and implement new website features on the Mobile Unlocks Gh website which significantly improved usability and accessibility.

## EDUCATION

### B.Sc Computer Engineering, Kharkiv National University of Radio Electronics

Kharkiv, Ukraine

Sep 2018 — Jun 2022

#### Bachelor's Thesis: Multi-Segment Network for a Logistics Company

Developed a wireless network using 802.11n/ac Wi-Fi with MikroTik and D-Link devices, installing four access points per floor for optimal coverage

### Fullstack Development, School Of Applied Technoogy

Amsterdam

Jan 2023 — Aug 2023

Spent 500+ hours mastering algorithms, data structures, and full-stack development through applied learning and mob programming while building projects with React, Node.js, JavaScript, TypeScript, Express.js, and MongoDB.

Developed skills in mob programming, Git, GitHub, Gitflow, and Agile practices, including daily standups and weekly demos.

### Software Engineering, 42 Wolfsburg

Jan 2024
